**Subject:** Request for Confirmation of BiOp/ESA noncompliance; NWS-2016-350 Electron Hydro  
**Date:** Tuesday, September 1, 2020 3:04:00 PM

---

Hello Everyone,

As previously discussed the Electron Hydro Project is not in compliance with the Corps permit and ESA special conditions, and as discussed in our phone call yesterday, it is my understanding that the NMFS and USFWS BiOps for the Electron Project are no longer valid for the previously permitted work, any proposed modifications of the work, or any plan to close down the site and construction until the next in water work window.

I am requesting an email or letter confirmation from both the USFWS and NMFS clarifying the Electron Projects invalid or noncompliance BiOps.

Please let me know if you have any questions about my request.

Sincerely,

Jenae Churchill  
Project Manager/Biologist  
USACE Seattle District
